## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17, 17, 23 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Otsuka et al in view of Tanaka et al.

There is disclosed in Otsuka a machine for injecting liquid into a subject, comprising: a plurality of air pumps 4 for receiving injectate; and a plurality of heads 10 in fluid communication with one of the pumps.

Tanaka discloses that it is known in the art to have a fluid injection head 7, the injection head having apertures (formed at the tip of branch pipes 23) for nozzles.

It would have been obvious to one skilled in the art to substitute the heads of Otsuka with that disclosed in Tanaka, in order to inject fluid into a meat product without damaging the meat.

In regards to the spacing of the nozzles from the subject during injection of the fluid, such is seen merely as an operational step and provides no structural limitations to the claims. The prior art discloses all of the structural limitations of the claims.

### ***Allowable Subject Matter***

Claims 15 and 18-22 are allowed.

***Response to Arguments***

Applicant's arguments filed September 12, 2003 have been fully considered but they are not persuasive. The functional recitation of spacing the nozzle from the subject during injection is not considered to be patentable subject matter in the apparatus claims.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
